Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-16, drawn to display device, classified in class 315, subclass 169.1.
- II. Claims 17-25, drawn to a method of manufacturing a display device, classified in class 257, subclass 72.

The inventions are distinct, each from the other because of the following reasons:

Inventions Group II and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case for claim 17, one can apply the layer of semiconductor material and process the layer in the same step rather than doing two steps. One can apply the control transistors to the amorphous light-emitting material rather than the other way around. One can apply a semiconductor material layer to a non-transparent sacrificial substrate and then process the layer. Next apply the layer to a transparent carrier and then etch away the sacrificial substrate. For claim 20, one can produce the layer of semiconductor material on a transparent carrier. One can process the layer to form control transistors while on the transparent carrier. Also one can apply the light-emitting material to a sacrificial substrate and then one can apply the control

transistors to the light-emitting material, and then dissolve or etch away the sacrificial substrate.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

A telephone call was made to David J. Goren on June 11, 2005 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Glenn Zimmerman whose telephone number is (571) 272-2466. The examiner can normally be reached on M-W 8-5.
